

Dmytro Makarov

Wrocław, Poland | +48.511.738.565 | dmtr.mkrv@gmail.com

Professional Summary:

Highly accomplished Microsoft Certified Professional with 20+ years of extensive experience in IT Infrastructure and Windows Administration, specializing in Microsoft 365, Azure, and enterprise-level system management. Proven expertise in Active Directory, GPO, PKI, Exchange, virtualization (Hyper-V, VMware ESXi), and comprehensive monitoring systems. Adept at driving efficiency through technical solutions, mentoring teams, and spearheading innovative projects in complex, multi-tenant, multi-forest environments.

Core Competencies:

Microsoft 365 (Office 365, Exchange Online, SharePoint Online, Intune, Teams), Azure (ADFS, AD Connect, Azure Backup, Conditional Access), Active Directory, GPO, PKI, Microsoft Exchange, Backup solutions.

Active certifications and courses:

Microsoft 365 Certified: Endpoint Administrator Associate

AZ-400T00-A Design and implementing Microsoft DevOps solutions (2023)

M10961 Automating Administration with Windows Powershell (2022)

M2821 Designing and Managing a Public Key Infrastructure (2021)

20346/7 Enabling and Managing Office 365 (2015)

Experience:

October 2024 – current, Senior Cloud Infrastructure Engineer/M365 Expert at AP Digital Solutions

Led optimization of GPO within a complex multi-forest environment, significantly enhancing system efficiency and user experience.

Administered and maintained a hybrid Microsoft 365 multi-tenant environment, ensuring robust performance and high availability for diverse organizational needs.

Configured, administered, and troubleshooted Active Directory, resolving critical issues and maintaining core directory services.

Designed and managed Public Key Infrastructure (PKI), strengthening security protocols and internal authentication mechanisms.

Oversaw Azure multi-tenant environment administration, managing cloud resources and service delivery.

Developed and maintained comprehensive technical documentation, improving knowledge transfer and operational continuity.

Managed and administered Exchange in a hybrid environment, ensuring reliable email services and seamless integration.

Designed, implemented, and managed Conditional Access Policies, significantly bolstering organizational security posture.

Ensured high-quality service delivery by rigorously adhering to and consistently improving organizational standards.

Communicated best practices and identified potential risks to business stakeholders, facilitating informed decision-making and proactive problem-solving.

Managed Dynamics 365 access and monitored tenant data usage, ensuring compliance and optimizing resource utilization.

Successfully implemented MDM (Intune), including Autopilot in hybrid and cloud-joined modes for a variety of Android and iOS devices.

Initiated and executed Azure and Office 365 cost optimization strategies, contributing to budget efficiency.

Spearheaded the upgrade of Exchange from 2010 to 2019, enhancing functionality and security.

Executed multiple Office 365 cross-tenant migrations, ensuring data integrity and business continuity.

Developed and deployed multi-tenant Conditional Access solutions, customizing security based on tenant requirements.

Managed all aspects of M365 deployment, including Teams and Teams telephony.

January 2020 – October 2024, Senior Infrastructure / M365 Expert Engineer at Acino www.acino.swiss

Optimized GPO for over 4000 employees across 73 countries, significantly improving system performance and security.

Administered and supported a hybrid Office 365 environment, ensuring reliable service delivery.

Managed the full lifecycle of Active Directory configuration, administration, and troubleshooting, maintaining critical infrastructure stability.

Re-designed PKI infrastructure, enhancing security and certificate management.

Administered a complex Azure multi-tenant environment, overseeing operations and resource allocation.

Created detailed technical documentation, standardizing procedures and aiding team efficiency.

Managed and administered Exchange in a hybrid environment, guaranteeing robust email operations.

Designed and implemented Conditional Access Policies, reinforcing cloud security for the organization.

Maintained quality service delivery, consistently meeting and exceeding organizational standards.

Communicated best practices and potential risks to diverse business units, fostering a collaborative and secure IT environment.

Managed Dynamics 365 access and monitored tenant data usage, ensuring compliance and operational efficiency.

Successfully implemented MDM (Intune) with Autopilot for hybrid and cloud-joined configurations across various Android and iOS devices.

Identified and implemented Azure and Office 365 cost optimization strategies.

Orchestrated the upgrade of Exchange from 2010 to 2019, improving system capabilities.

Executed multiple Office 365 cross-tenant migrations, ensuring smooth transitions and minimal downtime.

Developed automation for user creation and management, streamlining onboarding and offboarding processes.

Implemented multi-tenant MFA solutions, significantly enhancing security.

Designed and deployed multi-tenant Conditional Access solutions, tailored to specific tenant needs.

Managed all aspects of M365 deployment, including Teams and Teams telephony.

September 2019 - Senior Windows Administrator at Figleaf LLC

- Operated the team of locational administrators (3 people);
- Configuration, administration and troubleshooting Active Directory;
- Design, optimizing and implementing GPO (more than 300 employees);
- Design and implementing AD security policy;
- Administering Google Suite Enterprise;
- Implementing MDM;
- Create technical documentation.

Project portfolio:

- Preparation infrastructure to ISO 27001 certification;
- Configure Certification Authority;
- Enable bitlocker/vault in company;

- Implement Always-On VPN.

January 2019 September 2019 Senior System Engineer at Maxi Group International

- Operated the team of locational administrators (15 people);
- Configuration, administration and troubleshooting Active Directory (3 geo-distributed AD forests with more than 20 000 objects, 6 countries);
- Design, optimizing, and implementing GPO (more than 3000 employees);
- Design and implementing AD security policy;
- Configuration, administration and troubleshooting O365 (2 tenant);
- Work with Azure;
- Managing and designing backup plans for Veeam B&R;
- Configuration and administration Symantec Endpoint Protection on over 1500 hosts;
- Configuration MS services such as WSUS, WDS, Bitlocker network unlock, DFS, DHCP, etc
- Configuration, administration and troubleshooting MS Exchange 2016 (3 servers in DAG, more than 1500 mailboxes, Symantec Mail Gateway);
- Setup and administration hypervisors Hyper-V 106/2019, ESXi, Vsphere Cluster;
- Work with SAN Dell EMC Compellent and QNAP NAS;

Project portfolio:

- Implementing LAPS in organization;
- Optimizing Exchange database usage;
- Migrate infrastructure from Hyper-V to ESXi.

October 2018 January 2019 Infrastructure and Systems Administrator at StarLightMedia www.slm.ua

- Configuration, administration and troubleshooting Active Directory (7 AD forest with more than 30 000 objects);
- Design, optimizing and implementing GPO (more than 6000 employees);
- Design and implementing AD security policy;
- Configuration, administration and troubleshooting O365 (2 tenant, more than 6 000 users);
- Create technical documentation.

Project portfolio:

- Design and performing migration secondary domains to the one production domain.
- Design and implementing Teams in organization.
- R&D Microsoft PAW.

July 2016 – October 2018 Engineer of IT infrastructure department at IPLAND www.ipland.com.ua

- Configuration, administration and troubleshooting Active Directory (AD forest with 20 sites and more than 5000 object);
- Implementing GPO (install/uninstall software, provide setting for restrict user environment more than 2000 employees);
- Configuration, administration and troubleshooting DFS (DFS replication with more than 20 replication partner);
- Configuration WDS 2003/2008/2012 in branches of company;

- Administration MS Exchange Server 2010 (2 CAS/HT + 2MB (high availability NLB+DAG) more than 1500 mailbox, mail flow hygiene (ORF);
- Administration and configuration various infrastructure services such as Certification Authority, WSUS, TMG2010, File Services (FRSM), DNS, DHCP, etc;
- Setup and administration hypervisors Hyper-V, ESXi;
- Managing and developing backup plans for Symantec Backup Exec;
- Configuration and administration Symantec Endpoint Protection on over 1000 hosts;
- Configuration Zabbix (Monitoring of production servers and services);
- Administration Office365 (ADFS, AD Connect, SSO, Sharepoint Online, Exchange Online);
- Work with Azure (Azure Backup);
- Create technical documentation.

Project portfolio:

- Implementing MS Exchange 2010 Hybrid deployment for company Asnova Holding (1500 mailbox)
- Migrating from MS on-prem Fileservers to Sharepoint Online.
- Implementing MS Exchange 2016 Hybrid deployment for company Wine Bureau Goodwine

April 2006 – June 2016 System Administrator at LIA Ltd www.lia.lg.ua

- Setup and administration Windows Server 2003 / 2008 / 2012 (DNS, DHCP, File Services, Print Services, WSUS, WDS, DFS);
- Configuration and administration Remote Desktop Services for terminal access (Terminal Farms, NLB, Web Access, load balancing via high availability Connection Broker);
- Work with MS Exchange Server 2010;
- Setup and administration hypervisors Hyper-V (SCVMM), ESXi (vCenter);
- Managing and developing backup plans, managing backup images (Acronis, Veeam Backup);
- Setup and configuration Zabbix (Monitoring of production servers and services (Linux, Windows), network devices, configuring Zabbix proxies);
- Configuration and administration network equipment Mikrotik, Cisco (vpn, ipsec);
- Working with Office365 (Exchange online).
- Cooperation with providers and operators
- Office telephony maintenance and programming
- Operation with service centers/facilities
- Configuring, programming and monitoring of barcoding, printing and weighing equipment
- Create technical documentation.

Project portfolio:

- Designing and Implementing Terminal Farm for company.
- Migrating from Windows to Ubuntu for Front-office computers(over 300 machines)

Education:

2015 Bachelor's degree in Management at Rostov State Economic University

2015 Bachelor's degree in Management at Donbass State Mining and Metallurgical University
